## Tabset: House Assets

This demonstration tabset contains only a few tabs to demonstrate how the RecordsKeeper can be used to capture information about household assets, such as appliances. It is also used to demonstrate how to capture information about hobbies or collections of interest, in this case, recipes and plants.

---

### Tab: Garden Shrubs

These are examples of how one could use this system to keep readily available information about trees, plants and flowers.

---

Type of Plant:	Bush	Record #: 1
Common Name:	Wine & Roses Weigela
