
Tabset: Main

This demonstration tabset contains a variety of tabs that could be used to capture information about a variety of important items. View each of the tabs to see how the RecordsKeeper can be custom tailored to help you capture information for just about anything you may want to keep a record of.

Tab: Wallet Cards

This tab is used as an example of how information about wallet sized cards that are normally carried on the person or readily available can be captured. They usually need to be replaced in the event of loss or theft, and so the descriptive data in this category should contain information to facilitate that process.

Type of Card:	Bank Client	Record #: 1
----------------------	--------------------	--------------------
